The monthly Make-n-Take Teacher Sessions (1<sup>st</sup> Thursdays) are designed for teacher participants of the 3-day Pre-Columbian Mathematics Workshops to help foster a Community of Practice as we seek to become more culturally proficient educators and meet the demands of our growing culturally diverse student population. However, any interested educator is welcome to attend by giving us advance notice. The **Academy for Teacher Excellence** is proud to support these efforts that are designed to foster mathematics instruction at higher levels of thought by recognizing the rich cultural heritage of our students and building upon those strengths.

*Preserving Culture through Education*
